Abstract of the Disclosure

Systems, methods and gaming sets for progressive games, including progressive pull-tab games. The gaming sets include a plurality of plays, which in some embodiments take the form of pull-tab cards, and in some embodiments are electronic plays. The plays are associated with indicia of redemption value, with the set of plays including at least one jackpot play of underdetermined total value prior to dispensing of the play, and at least one set of plays with a predetermined value.
